

AI Media Literacy -- Course Handout

This one-page handout is seeded demo content for the 'document' lesson block type -- a real PDF served from backend/static/course-uploads/, the same place POST /api/courses/{id}/upload saves instructor uploads.

Three things worth remembering when a document is the primary lesson content rather than a supplement: (1) always keep a download link visible, not just an inline viewer -- some browsers and most mobile apps handle embedded PDFs poorly; (2) a document lesson still needs a real estimated_minutes, learners skim PDFs slower than prose; (3) if the source document changes, upload a new one and update the lesson's content_blocks -- there's no versioning, the old file just becomes unreferenced.
